Summary

Computer Science major with foundational experience in software development, Linux systems, and cloud fundamentals. Experienced with C++, Java, Python, and JavaScript, with exposure to IAM, infrastructure, and simple automation. Familiar with AWS projects, command-line tools, frontend web technologies, and basic databases, and comfortable working in team-based Agile environments.

Experience

Frontend Website Designer
Leadflow 📅 Dec 2025 – Feb 2026

- Designed and deployed a frontend lead-generation website (TestKitLeads.com) using HTML, CSS, and JavaScript, integrating GoHighLevel forms and deploying the site on Cloudflare for performance and reliability.

Junior Associate Software Engineer
RunYourMedia 📅 Oct 2023 – Nov 2024

- Assisted in developing and maintaining web-based tools and internal applications that integrated with CRM platforms to support client websites, lead management, and operational workflows.
- Supported frontend configuration and updates, including form setup, page adjustments, and UI changes to improve usability and data capture.
- Helped manage client data by organizing contacts, updating records, and ensuring accurate information flow between websites and internal systems.
- Performed testing and basic debugging to ensure reliable website and CRM automation functionality.

Medical Biller
172 NYC Dental 📅 Sept 2020 – June 2022

- Verified patient eligibility and insurance benefits across multiple providers to ensure accurate coverage and cost estimates.
- Consulted with patients on treatment needs, clearly presenting financial details and payment options.
- Collaborated with front desk and clinical teams to ensure accurate billing and coordinated patient care.
- Assisted with front desk operations, including customer service, scheduling, and insurance support.

Dental Floater
209 NYC Dental 📅 Feb 2019 – Sept 2020

- Supported clinical operations in a fast-paced, multispecialty dental practice.
- Performed diagnostic imaging (periapical, bitewing, panoramic X-rays, CT scans) to support accurate diagnosis and treatment planning.
- Maintained strict OSHA compliance through instrument sterilization, operatory setup, and equipment maintenance.
- Trained new staff on radiographic equipment, Tab32 dental software, and clinical protocols.

Education

Pursuing Bachelor of Science In Computer Science
York College
🗓 Queens, NY
📍 Anticipated Graduation 2027

Soft Skills

- Attention to detail
- Critical Thinking
- Team collaboration
- Conflict Resolution
- Customer service
- Communication
- Leadership skills

Technical Skills

- Microsoft Office
- SDLC/STLC
- Java/C++/Python
- JavaScript/HTML/CSS
- AWS (EC2, S3, IAM)
- Linux CLI/Git
- Backend/SQL
- Google Cloudrun
- DigitalOcean
- Manual/Blackbox testing
- Automation/Selenium
- Project Management Azure DevOps/Jira
- API/Postman
- Documentation
- Agile/Scrum
- Data-driven Framework
- Troubleshooting

Residence

- New York State Resident
- US Citizen
